Noah R. B. Hansen

MECHANICAL ENGINEERING STUDENT

Aarhus / Risskov, Denmark · (+45) 61 45 23 42 · noahrahbighansen@gmail.com · B1gum · noahrbhansen

PROFILE

Mechanical engineering student with a strong analytical mindset and experience with complex technical systems, reliability, structured problem-solving, technical documentation, data analysis, and troubleshooting. Comfortable working across hardware, software, and physical systems.

EDUCATION

BSc in Engineering (Mechanical Engineering)
Aarhus University
Aarhus, Denmark — *Aug. 2024 – Present*

- Member of the Education Committee.
- Provisional GPA: 10.5

HTX – Mat A/Fys A
Vejle Tekniske Gymnasium
Vejle, Denmark — *Aug. 2020 – Jun. 2023*

- Board member of the student council.
- Highest average grade in the nation; weighted GPA: 12.6.

SELECTED ACHIEVEMENTS

- Highest weighted GPA in the nation (2023)
- Danish Physics Olympiad national final qualification (2022)
- Georg Mohr competition winner seminar attendee (2022)
- Honourable mention, Projekt Forskerspirer (2022)

SKILLS

Technical	Electromechanical troubleshooting, maintenance, fluid systems, safety/compliance
Tools	MS Office, Mathcad, LaTeX, Inkscape, AutoCAD
Programming	Python, MATLAB, scripting
Languages	Danish (native), English (C2), German (B1)

WORK EXPERIENCE

Maintenance Assistant, LEGOLAND — *Dec. 2023 – Dec. 2025*

Billund, Denmark

- Executed preventive maintenance and repairs on traffic school systems, including motors, gearboxes, and braking mechanisms.
- Maintained over 70 Miniland animations by diagnosing faults and implementing durable fixes under time constraints.
- Worked across electromechanical subsystems ranging from small-scale drivetrains to pump systems and sensors.

Facility Assistant, LEGOLAND — *Jun. – Dec. 2022 & Aug. – Dec. 2023*

Billund, Denmark

- Installed and dismantled seasonal light fixtures, ensuring electrical connections and mounting structures met safety guidelines.
- Conducted inspections of technical rooms, bridges, ladders, cooling systems, fire extinguishers, and other critical park infrastructure.
- Reported deviations clearly and followed up with relevant personnel to ensure timely corrective actions.

Tutor, Syddansk Erhvervsskole — *Aug. 2021 – Jun. 2023*

Vejle, Denmark

- Provided peer tutoring and supported problem-solving and clear communication across subjects.
- Strengthened communication skills through adaptive explanations and feedback, both 1:1 and in small groups.

PROJECTS & RESEARCH

Tungsten — author and maintainer

Open-source Neovim plugin enabling computational workflows inside LaTeX documents via Wolfram Engine and Python.

Superconductors (YBCO) project
Performed four-point probe measurements through the critical temperature and analysed I–V data using Python.

Projekt Forskerspirer
Research project on doping semiconducting nanoparticles to tune plasmon resonance; received an honourable mention.

DødsBo
Contributed to the design and iterative improvement of a competition vehicle; achieved a top-10 finish in Jutland.
